Software Designer I / Technical Solutions Consultant II, Hewlett-Packard Polska, Kraków

2012 - 2014

Technologies: PHP, JS, HTML, XML, CSS, SQL, Drupal, SVN, Linux

- defined areas for improvement in software updating and developed relevant tools to optimize them,
- designed and programmed an application for making pre-installation back-ups and for installing updates of HP Hiflex Webshop which significantly shortened the time required for installing,
- developed a tool for updating, merging and converting software dictionary which optimized the processes,
- evaluated updates, installations and configurations and made recommendations for resolutions,
- responded to technical questions on subjects such as features (including programming issues), specifications and repairs on products and options,
- proactively assisted internal and external businesses and end-users to avoid or reduce the incidence of technical problems,
- resolved technical issues from incoming internal and external contacts and notification systems,
- checked software functionalities and debugged source code

Technical Support Engineer / Junior PHP Developer, Hiflex Poland, Kraków

2012

Technologies: PHP, JS, HTML, CSS, Drupal

- diagnosed software errors and warnings and implemented relevant changes in the source code (debugging and bug fixing),
- checked software functionalities,
- communicated with customers and developers
