- 08.2014 - 10.2017: Development of Vegas CMF (open source), tech-stack: PHP, MongoDB, Phalcon PHP Framework, PhpUnit, JQuery.

About

Developer who combines a keen eye for detail with a clear view of the overall picture. His strong analytical skills, honed over a decade in the field, enable him to deliver top-quality results across a wide range of projects. His professional journey has taken him through diverse business landscapes, from educational platforms and the financial sector to tourism and beyond, enriching his portfolio with varied experiences. Tomasz is currently a whizz in PHP and JavaScript, with a robust grounding in TypeScript, Angular, and React to complement his skill set. When he's not coding, loves to unwind with a good board game, practice piano, or spend time actively hiking or cycling.

Software Designer I/Technical Solutions Consultant II

Hewlett-Packard Polska

2012 - 2014
Kraków

Industry: Web-to-print
Technologies: PHP, JS, HTML, XML, CSS, SQL, Drupal, SVN, Linux

* defined areas for improvement in software updating and developed relevant tools to optimize them,

* designed and programmed an application for making pre-installation back-ups and for installing updates of HP Hiflex Webshop which significantly shortened the time required for installing,

* developed a tool for updating, merging and converting software dictionary which optimized the processes,

* evaluated updates, installations and configurations and made recommendations for resolutions,

* responded to technical questions on subjects such as features (including programming issues), specifications and repairs on products and options,

* proactively assisted internal and external businesses and end-users to avoid or reduce the incidence of technical problems,

* resoled technical issues from incoming internal and external contacts and notification systems,

* checked software functionalities and debugged source code
